

श्री कृष्ण भार्गव

श्री प्रमोद भार्गव
विभागीय सचिव, औरंगाबाद

GOVERNMENT INSTITUTE OF SCIENCE
AURANGABAD

Background

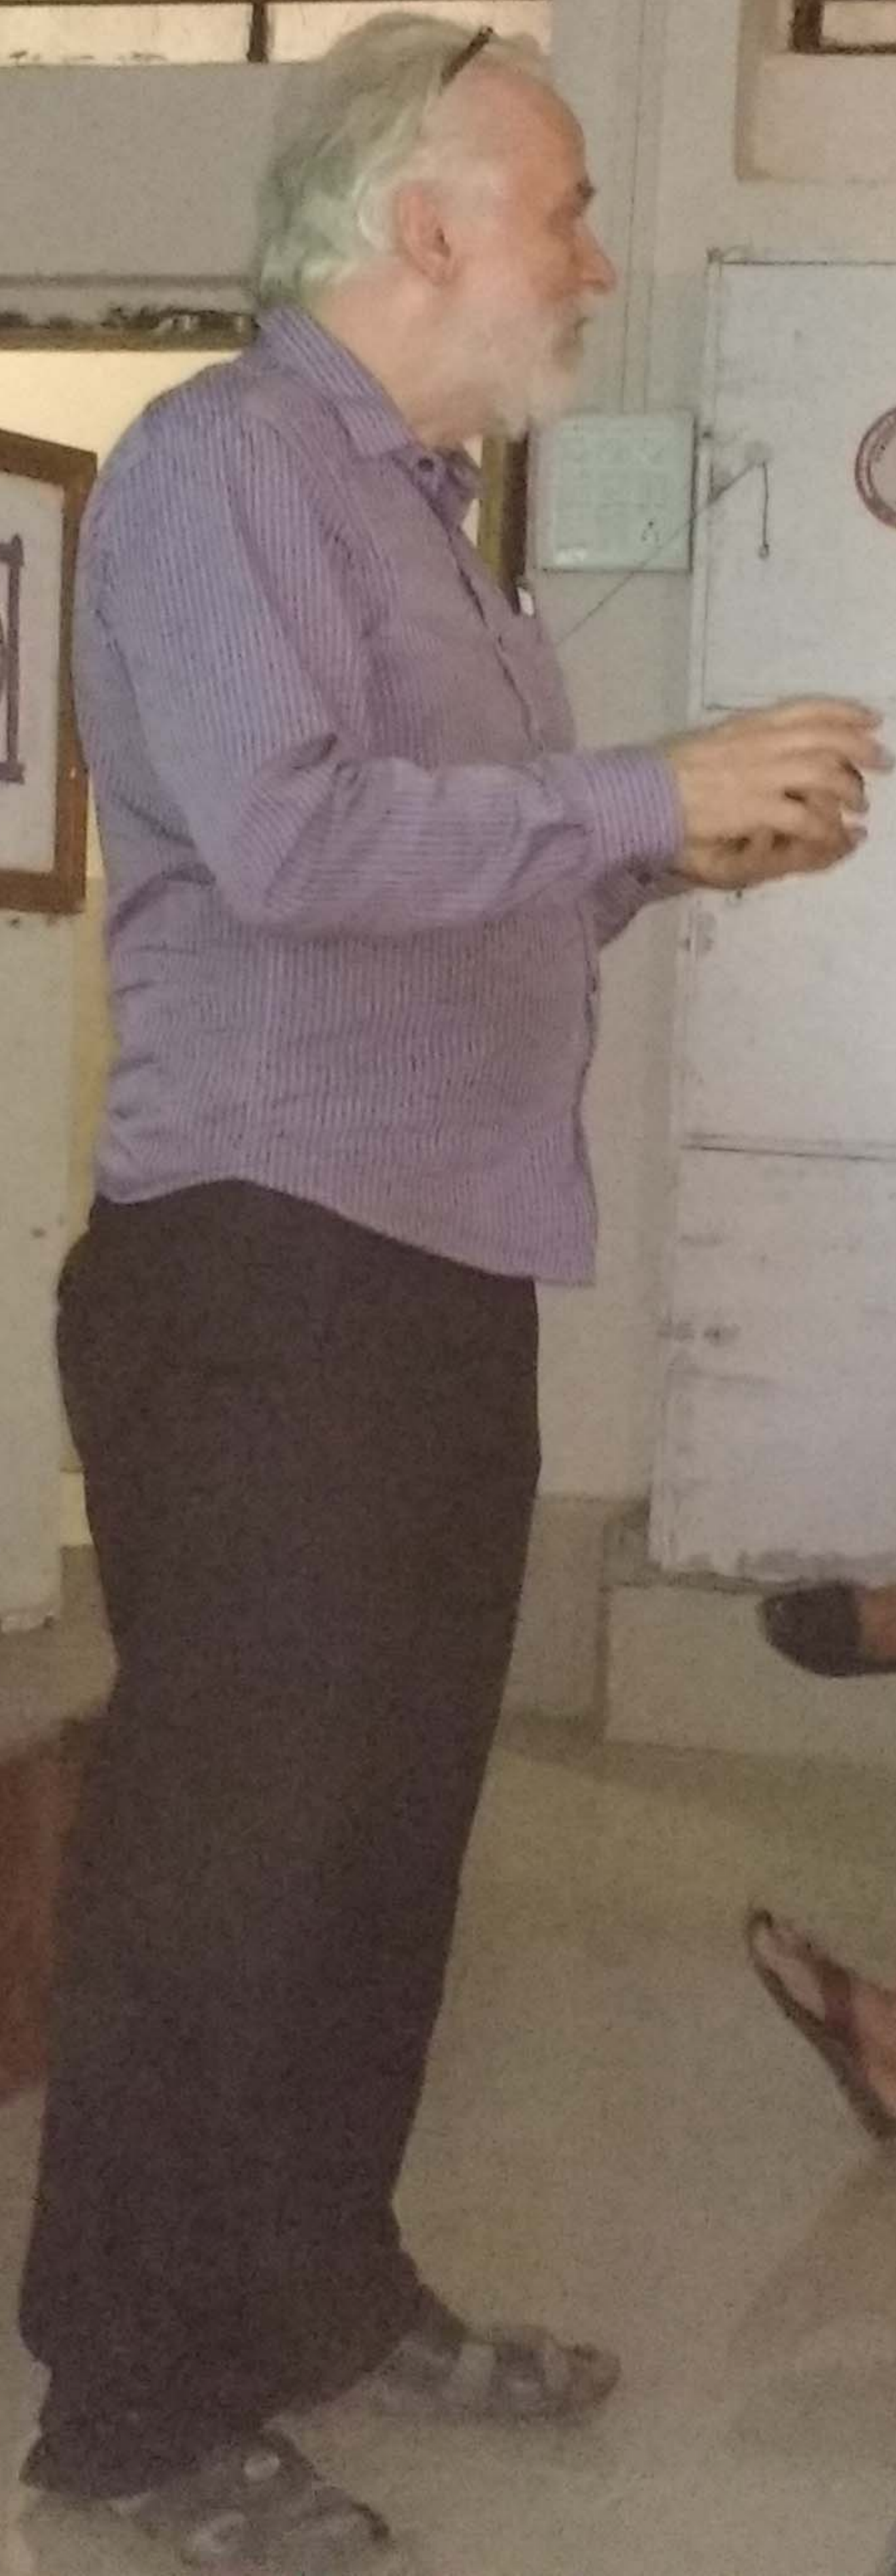

- Renewable energy is any sustainable energy source that comes from the natural environment, maintained or replaced by nature after use.
- These sources of energy include water, wind, sun, biomass and heat from the Earth's interior.
- Available as an indigenous and continuous resource in considerable quantities all over the world.
- Development and use of renewable energy could help conserve foreign exchange and generate local employment.

Non-polluting and help conserve the environment thereby reducing the global warming.

साक्षात्, श्रीमान्
